- SSC, APSWR School for Girls, Repalle – 2014   78.00

Technical Skills

- **Programming Languages:** HTML, CSS, JavaScript
- **Frameworks & Libraries:** Bootstrap
- **Databases:** SQL
- **Tools:** Visual Studio Code, Eclipse

Technical Summary

Proficient in designing and developing responsive web applications using HTML, CSS, Bootstrap, and JavaScript. Adept at implementing client-side validation, designing user interfaces, and managing data through SQL. Demonstrates sound knowledge of full-stack development and hands-on experience with real-time projects, showcasing problem-solving ability and attention to detail.

Academic Project

Project Title: Sophisticated Extensible Framework for Optimized Airline Capacity Allocation and Customer Booking

Description: The project focuses on designing a smart airline booking system that allocates seats efficiently based on customer preferences and airline capacity. This framework aims to enhance the operational performance of airline reservation systems by reducing overbooking and improving customer satisfaction.

Usage in Future: Such frameworks can revolutionize airline operations by offering intelligent forecasting and flexible booking management, ultimately enhancing user experience and optimizing airline profits.

Software Used: Frontend - HTML, CSS, JavaScript | Backend - Java

Strengths

- Self-motivated and goal-oriented
- Quick learner with a passion for technology
- Strong team player with effective collaboration skills

Hobbies

- Craft making
- Travelling
